1. Snails Emerge

14 snails on a tree !

Why

2. Frost on leaves?

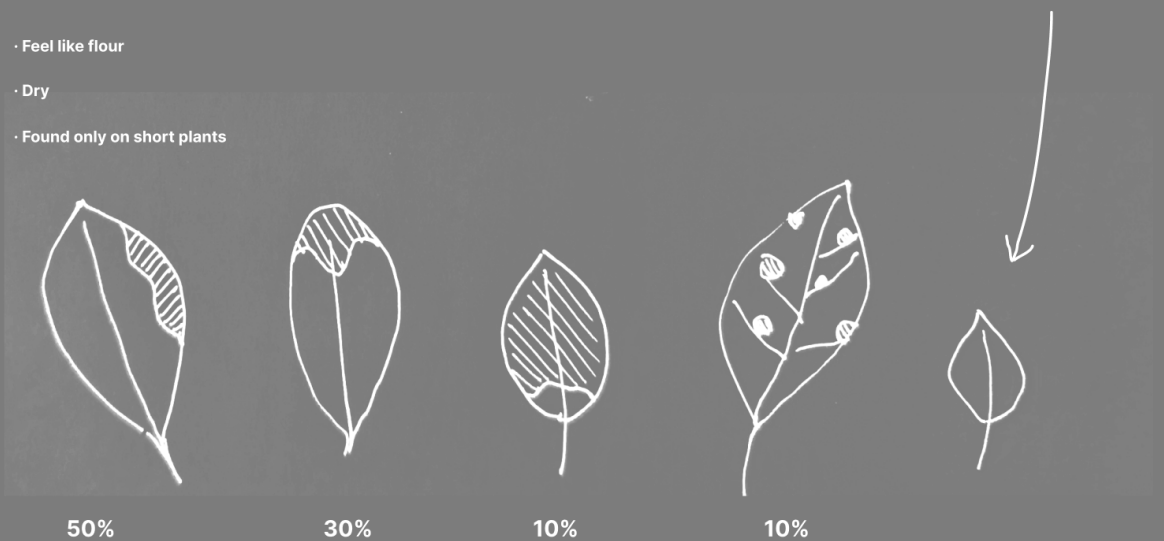

Old leaves

Young leaves

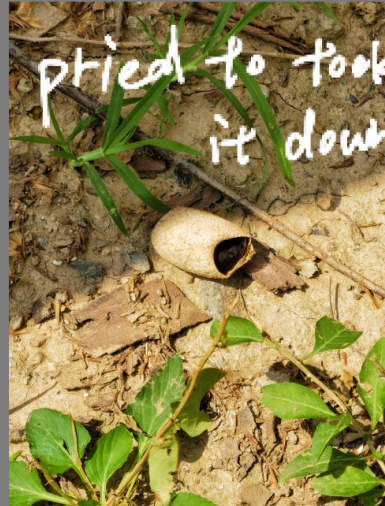

- Feel like flour
- Dry
- Found only on short plants

3. Nailed pupa

Beginning

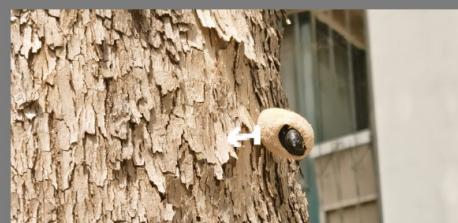

- White outside, black inside
- Looks like a chrysalis (蛹) of butterfly

- Dry
- Firm, doesn't break easily

- It's light, feels empty
- Smells like fish

Then I found more and more

- All on the trunk of tall alamos
- 2-5 on each tree

3. Nailed pupa

Other forms

A comparison
