For Wednesday

我选择了我现在居住的小区作为调研地点，因为这是我7年前居住的地方而我已经很久没有好好观察过它，并且在印象中它应该是一个很好的城市与自然的结合体。我很好奇它为什么能保持到现在，并且在居民中还有如此好的口碑。我很好奇它是怎么做到的，是在居民中还有如此好的口碑。我很好奇它是怎么做到的，是在居民中还有如此好的口碑。我很好奇它是怎么做到的，是在居民中还有如此好的口碑。

I would like to explain a little why I say it is evenly matched, firstly in the early years when it was still well managed by the property it was full of plants and trees, however in recent years the property has changed and the weeds have taken over. I think it is because the weeds are growing faster than the plants. I think it is because the weeds are growing faster than the plants. I think it is because the weeds are growing faster than the plants.

Then there's the flower pond next to it, which used to be as tall as I've drawn it, but now it's half gone, the lower half I guess the property tried to grow something but it didn't seem to work out. It's half weeds and half empty space. I think it is because the weeds are growing faster than the plants. I think it is because the weeds are growing faster than the plants. I think it is because the weeds are growing faster than the plants.

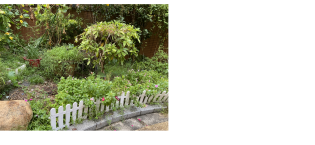

然后我来向前方的大草坪，我本来记得这里一个月前还是一种野生植物的状态，因为没有打理，野草长到膝盖一半的位置，可能是才割不久，已经光秃秃的露出了泥土。这里也有两个非常有趣的地方，第一是这棵树，从我还是个小孩起它的底部这里就是空空的，7年不见更大了，为了防止被完全蛀空还建了个木架，很像像这么大的洞口，这样才不至于像普通草坪一样被完全蛀空。第二是这棵树，从我还是个小孩起它的底部这里就是空空的，7年不见更大了，为了防止被完全蛀空还建了个木架，很像像这么大的洞口，这样才不至于像普通草坪一样被完全蛀空。

Another interesting phenomenon is that you can see what appears to be a bamboo pole supporting a tree, but in fact there are two living trees here, they are tied together and I can no longer tell who is supporting who. I think it is because the trees are growing together. I think it is because the trees are growing together. I think it is because the trees are growing together.

然后我继续往前走，我又拍下来这张照片，因为我觉得花儿生长在地面而杂草生长在花盆里有点好笑。I think it is because the flowers are growing in the ground and the weeds are growing in pots. I think it is because the flowers are growing in the ground and the weeds are growing in pots.

然后我走到了有车位的地方，可以看见这些可怕的被种在缝隙里的树，根部已经延长到能汲取营养的所有位置，说不定已经开始插入水泥地里。I think it is because the trees are growing in the gaps. I think it is because the trees are growing in the gaps. I think it is because the trees are growing in the gaps.

总结一下就是在人类稍微干预对自然进行管理的一小段时间，自然就会自然的用它自己的方式回归自然，不管是谁让人做这些清理，又或者是打乱人们的计划。I think it is because the nature is regaining itself. I think it is because the nature is regaining itself. I think it is because the nature is regaining itself.

maybe the next step

人与自然关联的，但人与自然不关联的

AZ发展是否会成为威胁
