

# Hebei Province, in north China

Exploration #01

2022.8.30 16:30pm-18:20pm

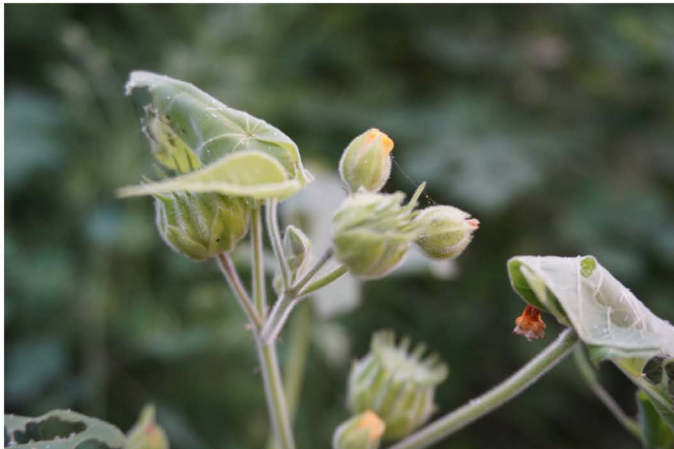

Some deserted factories here

I noticed a lot of  
"strange" plants along  
the way.

[There are so much nature that  
we never noticed in the city.]

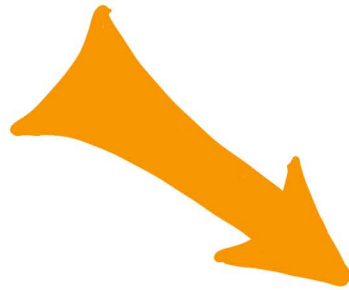

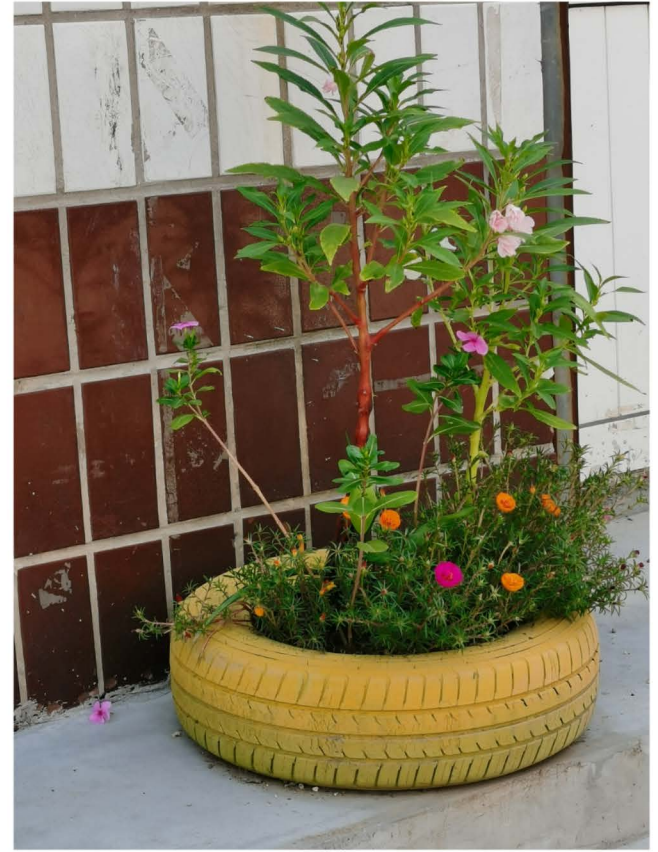

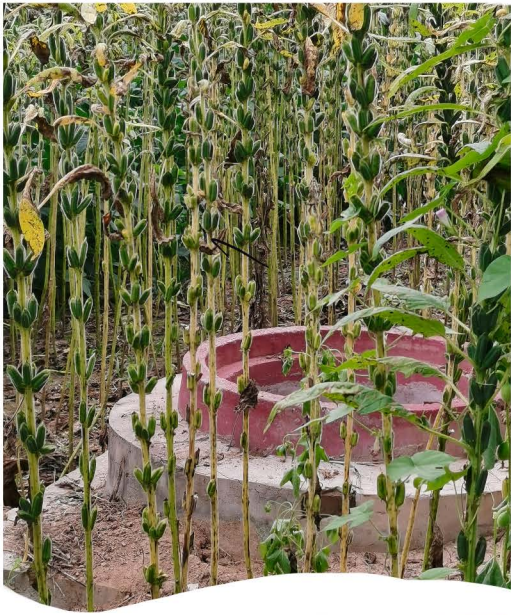

Walked through a field thick with yellow daisies.

不由得感慨这片花丛放大了“生长”的变化

Can not help feeling these flowers magnified the change of "growth".

! 废弃物污染环境

The waste is polluting the environment.

^\_^ 却也可以做些对自然有益的事,

比如提供生长环境

But it can also do sth. good to nature,  
such as providing an environment to  
grow up.

《等待人为修剪的 urban nature》

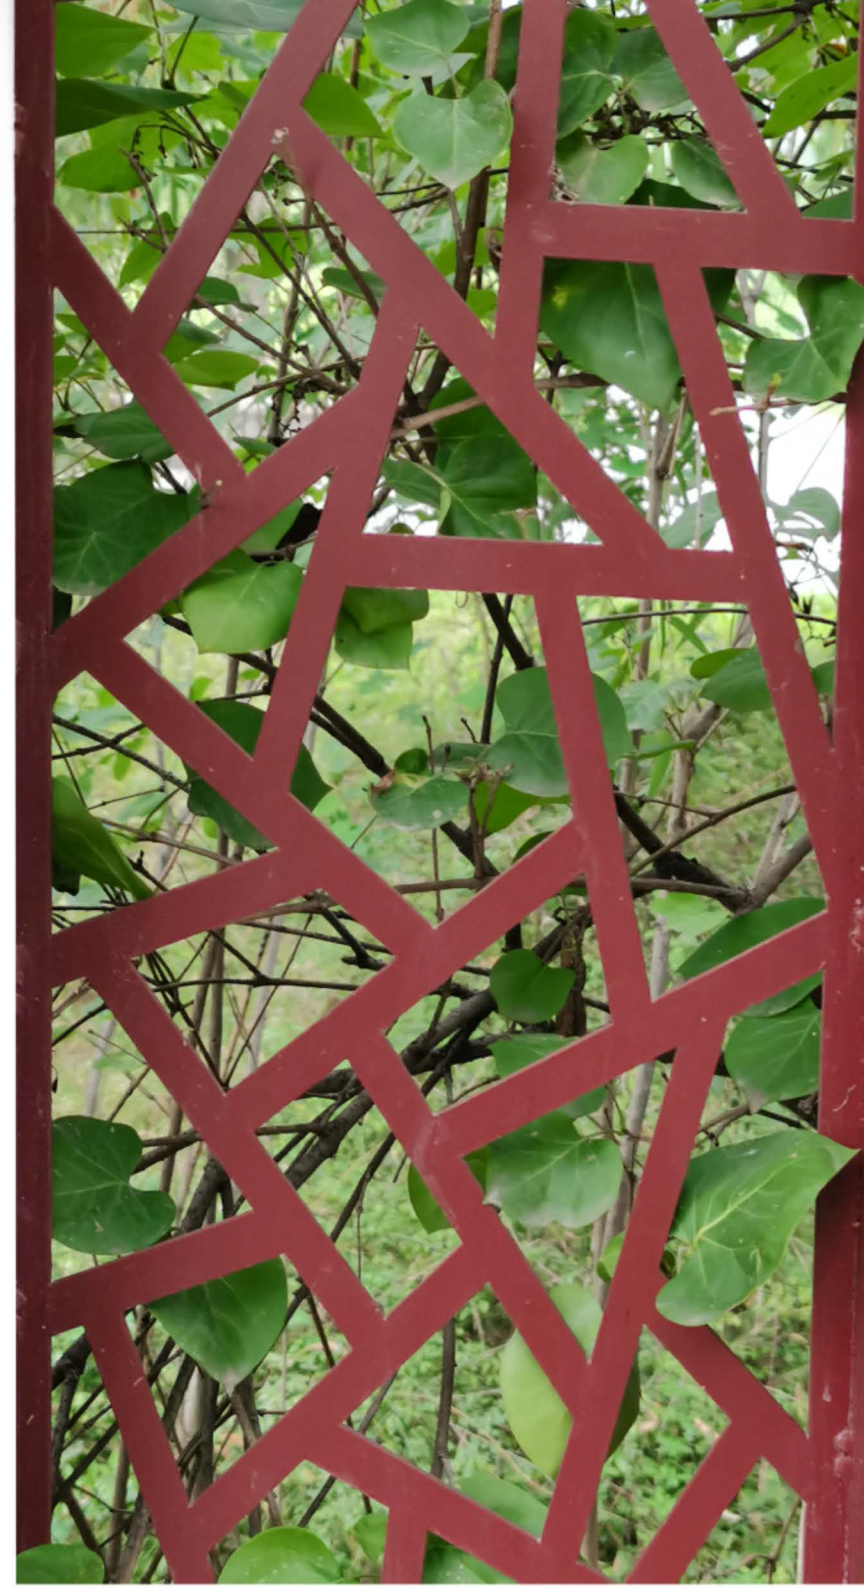

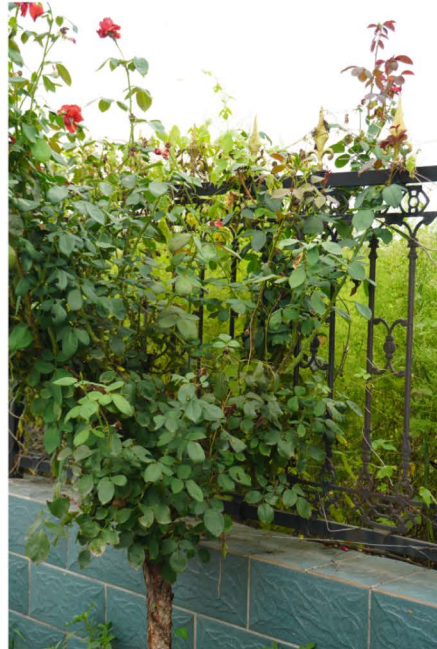

《Urban nature that waiting to be trimmed》

Like they haven't cut their hair for a long time.

Find the cheek and break through  
the fence.

Passed by an abandoned factory...

These scenes let me personify the relationship between artificial things and nature lives.

And some key words occurred to me!

Nourish

Embrace

Breed

伺机而生

wait for an opportunity to live

After being neglected,  
grass replaced the previous  
plant in the pots.

↑  
Grass growing in the cracks of tiles

↓ 葡萄树  
in front of the trunk,  
a vine grows up!

① A park that few people come

The floor is strewn with fallen leaves.

Moss green

the decay  
of leaves  
nourishing  
the soil

Many holes on the soil,  
near the root of tree.

A deserted pool  
of a factory

果然水多的  
地方就有蚊子

The color of water  
is strang, ● ●

有时候也报报喜欢一些城市中的巧妙纹理

Sometimes I really like the nature textures in urban life !

Red and white  
paint on the tree.

texture of tree bark

↓  
?? Is this for some  
animals?

Amazing growing  
situation →
