

An ant on a leaf

The trees are cut by human

Trash and leaves live together (by whatchamacallit)

Grass grown from the ground, looks like Petri dish

Relationship between steel tube, screw and stone

A leaf bitten by insects

Several withered leaves with a beautiful shape and hollows.  
Some fruits stick on these leaves as well.  
We collected those withered leaves and the fresh leaves it might used to be.

Human actions on a nature stone

A big moth

Bright color mucus on a stone

A big mantis with the same color as tree

The whole fresh leaf and withered leaves nearby

People exercise with trees

I found a plant with hairs swaying in the wind, wondering what it is. Then, I find these hairs may used to stick plants on trees, but this plant have nothing to stick on.
